Top Skills

React Query

Redux.js

Git

Edita Motuzė

Front-end developer

Kaunas, Kauno, Lithuania

Summary

I am public health specialist and even though I am doing great in this field, in the last few years I have had the feeling that I am not in the field where I would like to spend my whole life. So I decided that I wanted to retrain and started learning HTML, CSS and JavaScript on my own. After few month of self-learning I started and completed frontend courses at Code Academy (React.js, Node.js, basics of Typescript, Git and etc.), internship at Cognizant and various online courses to gain knowledge about React Query, Redux and other libraries.

My latest work: <https://mountain-cabin.netlify.app> , <https://github.com/editaMot/mountain-cabin>
